## KNOW THE SYMPTOMS

There is no standard screening test for pancreatic cancer, which makes it vital for people to know the signs and symptoms of the disease.

Yellow Skin or Eyes

Loss of Appetite

The symptoms of pancreatic cancer are often vague and may at first appear to be associated with other less serious and more common conditions.

Abdominal Pain

Mid-Back Pain

Unexplained  
Weight Loss

Digestive  
Problems

New-onset Diabetes

These symptoms may not all occur at once so consult your doctor and ask to be checked for pancreatic cancer if you notice one or more of the symptoms listed.

Change in Stool
